DATA MINING SOLUTIONS
FOR LIFE SCIENCES

**VICTOR
SABARLY**
CHAIRMAN

A graduate from the Ecole Polytechnique and PhD in biology, Victor conducted omics data analysis projects for various academic entities such as INSERM, INRA or CEA. Then, as head of bioinformatics and biostatistics at Profilomic, he developed data mining solutions especially for metabolomics.

1 REVEAL THE TRUE POTENTIAL OF YOUR DATA

Data analysis requires specific skills that are rare in the field of life sciences. Our goal is to enable you to conduct your research projects as efficiently as possible by providing you our multidisciplinary expertise.

2 OPTIMIZE YOUR R&D PROJECTS

Your costs are known through the establishment of a quotation and deadlines for completing your studies reduced as our teams are directly efficient on your issues. You also avoid hiring and training additional staff.

3 KEEP CONTROL OVER YOUR SOFTWARE

All our developments are done in a process of open innovation and under free licenses providing you complete control over the tools we deliver. This freedom is the best way to guarantee the performance of our software, whose operational principle is displayed, and their safety regarding the confidentiality of your data.

**MARC
DUBOIS**
CEO

MSc in bioinformatics and MSc in plant biotechnology, Marc developed software for various research laboratories of INRA and CNRS. The programs he developed are based on his expertise in the establishment and management of databases as well as his knowledge of omics data processing techniques.

Do not hesitate to contact us to request a quote by calling +33 184 173 916 or by email contact@omics-services.com.

OUR SERVICES

STUDIES

We specialize in the analysis and integration of large omics data sets: genomics, transcriptomics, proteomics and metabolomics.

Our studies allow you to identify biomarkers, decipher biological processes, discover new therapeutic targets or to demonstrate nutritional or health claims.

BIOINFORMATICS AND BIOSTATISTICS SUPPORTING RESEARCH

DEVELOPMENT OF TAILORED SOFTWARE SOLUTIONS

We develop tailored programs adapted to your needs. You get training in their use and benefit from the support of our teams. Our expertise comprises databases management, programming, client-server architecture, web services, visualization tools or statistical tools.

BIOINFORMATICS AND BIOSTATISTICS EXPERTISE

Our team can also provide you with expert consultancy. We are used to working in various fields of life sciences: health, neurosciences, microbiology, plant biology, ecology...
